

Collect the Great Masterpieces

Art lovers have found that the great masterpieces that go for tens of millions of dollars each can be theirs for a tiny fraction of those amounts—on the stamps of issuing nations from around the world. This explains why the Art on Stamps theme is among the most popular of all topics.

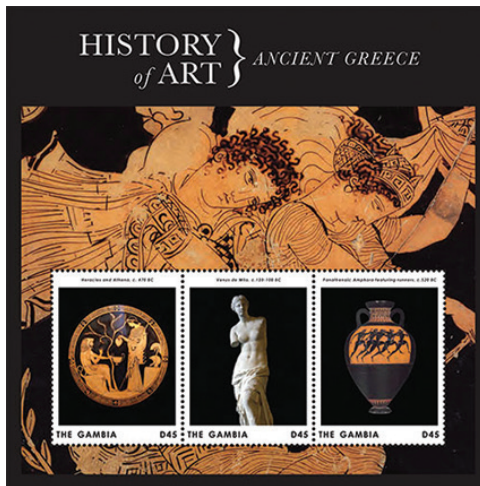

One of the finest sources of these miniature works of art is the website of the Inter-Governmental Philatelic Corporation of New York.

We have presented in other articles on this Stamp News Now site a number of specific mini-omnibus issues. In this brief presentation, we take you through a selection still available on a variety of themes, all still available, with issues going as far back as 2013.

For additional information on more than 2,500 Art and Arifacts on Stamps issues, please go to www.igpc.com.
